

Table of Contents

Preface

Acknowledgements

Contributors

Part I: IoT Ecosystem Concepts and Architectures

1. Internet of Things: An Overview
2. Open Source Semantic Web Infrastructure for Managing IoT Resources in the Cloud
3. Device/Cloud Collaboration Framework for Intelligence Applications
4. Fog Computing: Principles, Architectures, and Applications

Part II: IoT Enablers and Solutions

5. Programming Frameworks for Internet of Things
6. Virtualization on Embedded Boards as Enabling Technology for the Cloud of Things
7. Micro Virtual Machines (MicroVMs) for Cloud Assisted Cyber-Physical Systems (CPS)

Part III: IoT Data and Knowledge Management

8. Stream Processing in IoT: Foundations, State-of-the-art, and Future Directions
9. A Framework for Distributed Data Analysis for IoT

Part IV: IoT Reliability, Security and Privacy

10. Security and Privacy in the Internet of Things: A Survey
11. Internet of Things- Robustness and Reliability
12. Governing Internet of Things: Issues, Approaches and New Paradigms
13. TinyTO: Two way Authentication for Constraint Devices in the Internet of Things
14. Obfuscation and Diversification for Securing the Internet of Things (IoT)

Part V: IoT Applications

15. Applied Internet of Things
16. Internet of Vehicles and Applications
17. Cloud-Based Smart Facility Management
